Admin User Guide

1. Introduction

This platform is designed to support administrators in collecting and analysing user feedback through structured, guided interactions. It enables the creation of issues, gathers participant responses, and transforms raw input into meaningful insights.

The system is particularly useful for understanding user perspectives on specific topics, identifying patterns in feedback, and supporting data-driven decision-making.

2. Key Features Overview

The platform provides three main functionalities for administrators:

- **Issue Creation**

Administrators can create and publish issues that will be presented to users. Each issue serves as the starting point for user reflection and response collection.

- **Response Monitoring and AI Analysis**

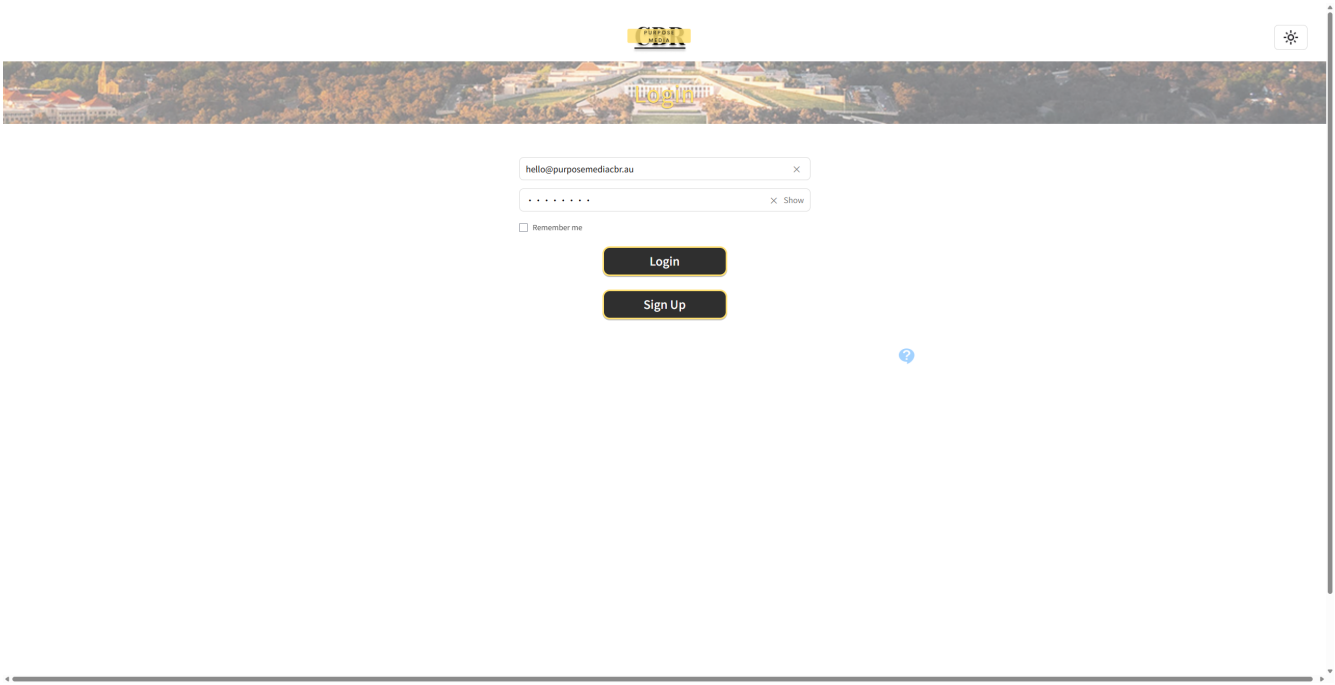
The system collects user responses to guided questions and displays them in an organised format. Administrators can review individual answers or aggregated results. In addition, an integrated AI module helps summarise user responses, making it easier to identify key themes and insights without manually analysing all data.

- **Participant Engagement (Email & Coupons)**

Administrators can send emails to participants, including incentives such as discount coupons. This feature helps improve participation rates and user engagement.

3. Login

By clicking the "LOGIN" button to goto "https://co-design-project.vercel.app/login".

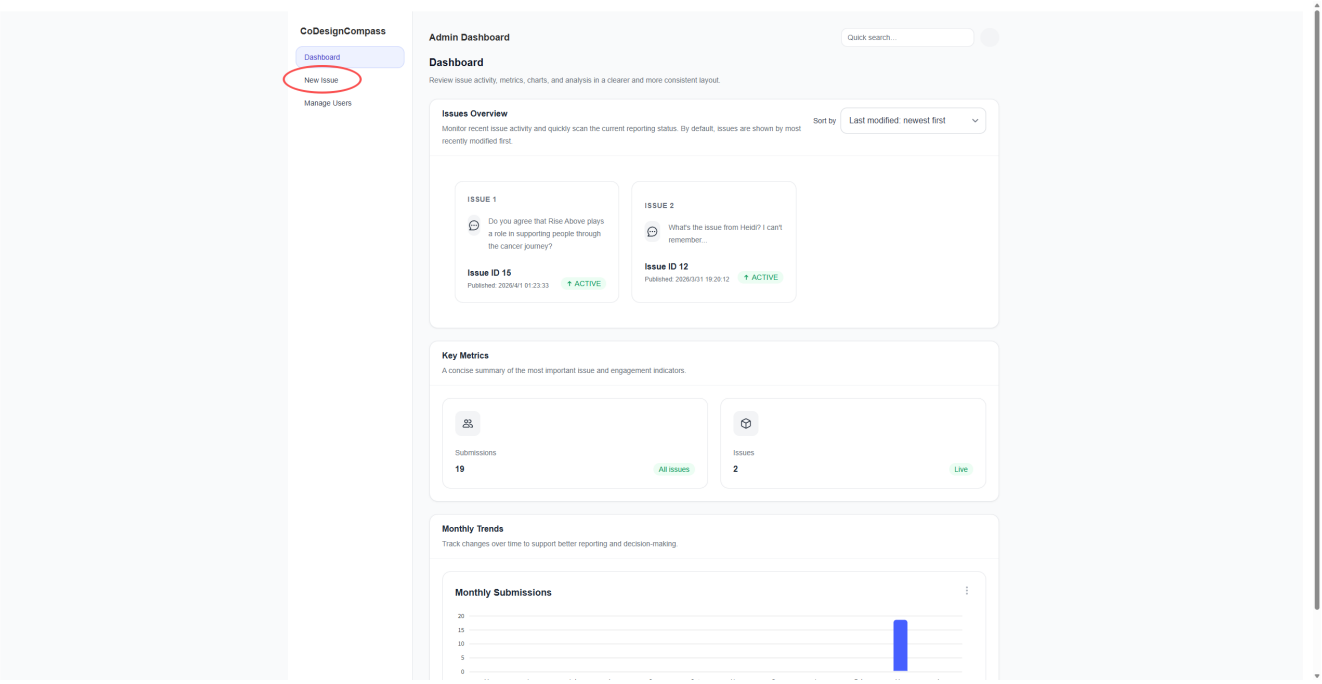


Email: compass@purposemediacbr.au

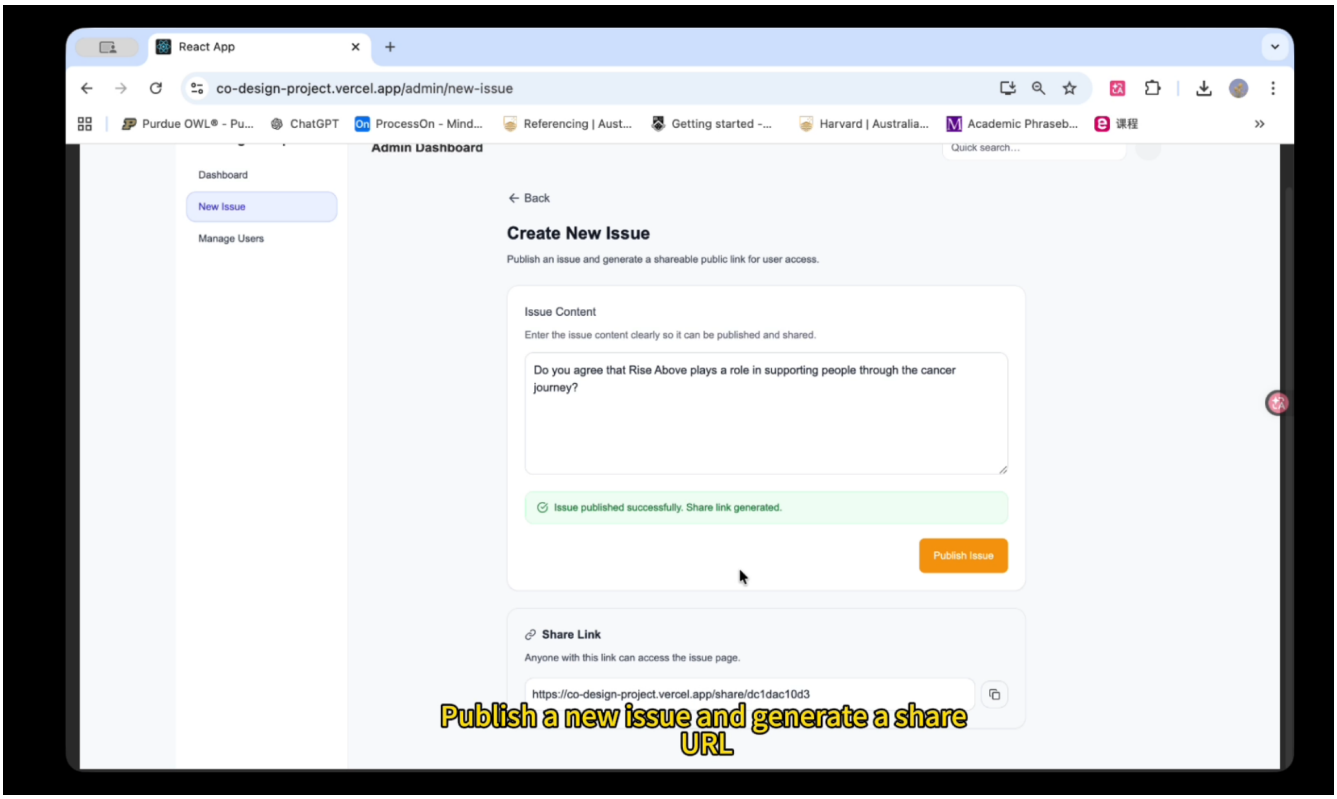
Password: Heidi123*

4. Create New Issues

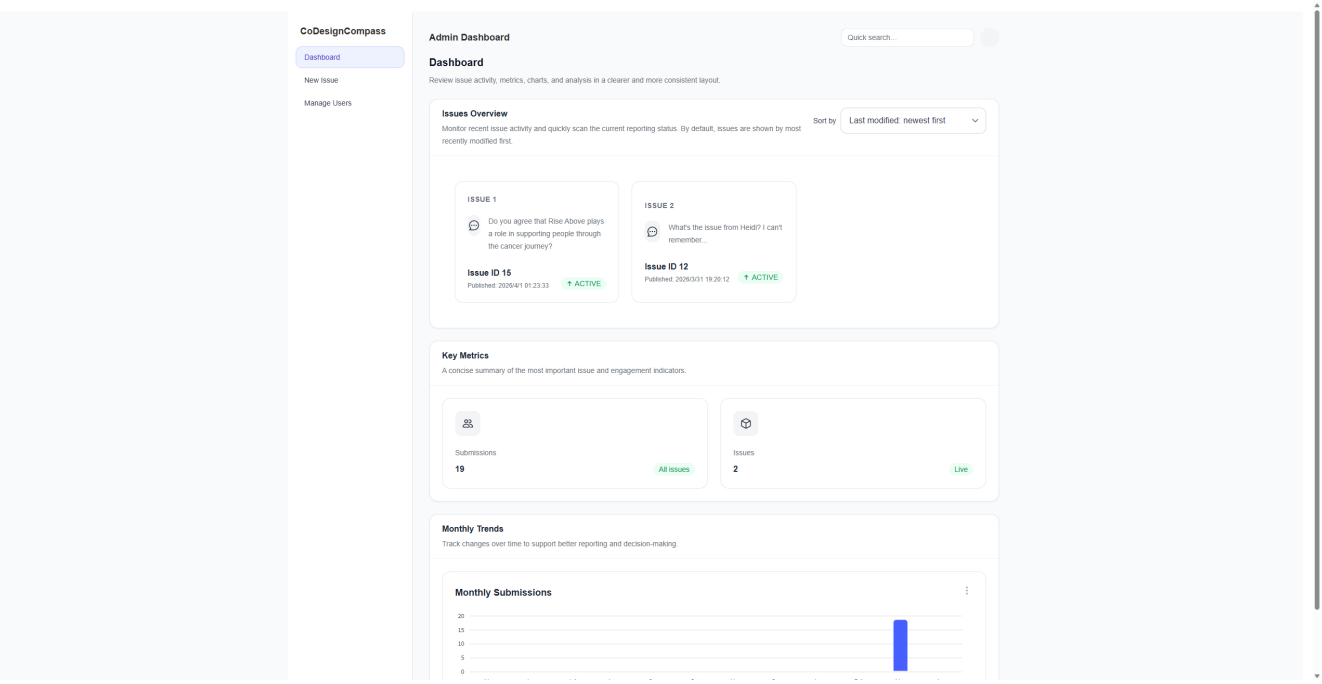
After login, you can create an issue by clicking the "New Issue" button.



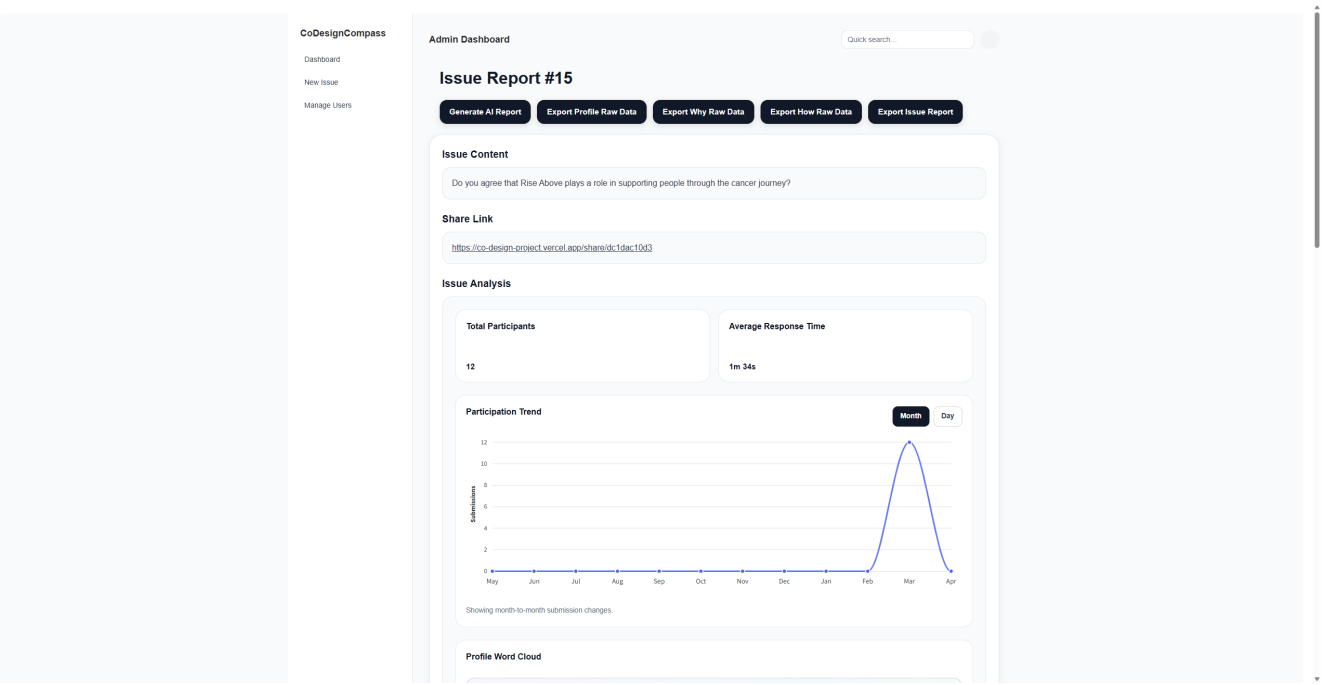
Enter the issue you want to ask and click the "Publish Issue" button. Then the new issue will be published to the public and generate a share link which people is gonna to use to answer the questions.



5. Viewing Responses

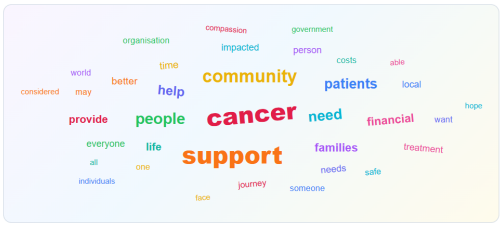


By clicking certain issue card, you can view all the data related to it, like answering trend, word cloud and AI summary.

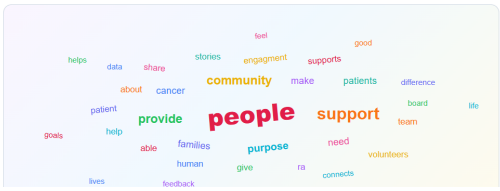


Word Cloud:

Why Word Cloud



How Word Cloud



AI Summary:

The collective sentiment is profoundly positive, reflecting strong agreement on Rise Above's vital role. Participants consistently express empathy for cancer patients and their families, a determination to provide support, and a deep appreciation for the organization's compassionate, human-centered approach. Many sentiments are rooted in a moral imperative and an understanding of the unique and essential gaps Rise Above fills.

Insights & Themes

This report synthesizes qualitative feedback regarding Rise Above's role in supporting people through their cancer journey. Overwhelmingly, participants agree that Rise Above plays a crucial role, primarily through financial assistance, holistic non-medical support, and fostering a strong local community. Key themes include addressing financial burdens, providing emotional and practical relief, and filling critical gaps left by larger organizations or government support. Participants consistently highlight the organization's compassionate, human-centered approach and its significant positive impact on patients' quality of life and dignity.

Identified Themes

Financial Relief & Dignity

PAIN POINTS: Additional costs at a time when someone may not be able to continue working., May need to sacrifice buying food over their medication., People could get into financial difficulty and could face even tougher emotional and financial decisions., Society/government does not provide the $ help., Cancer is EXPENSIVE - tests, surgery, work disruption, medications, supplements., High living costs, struggling families.

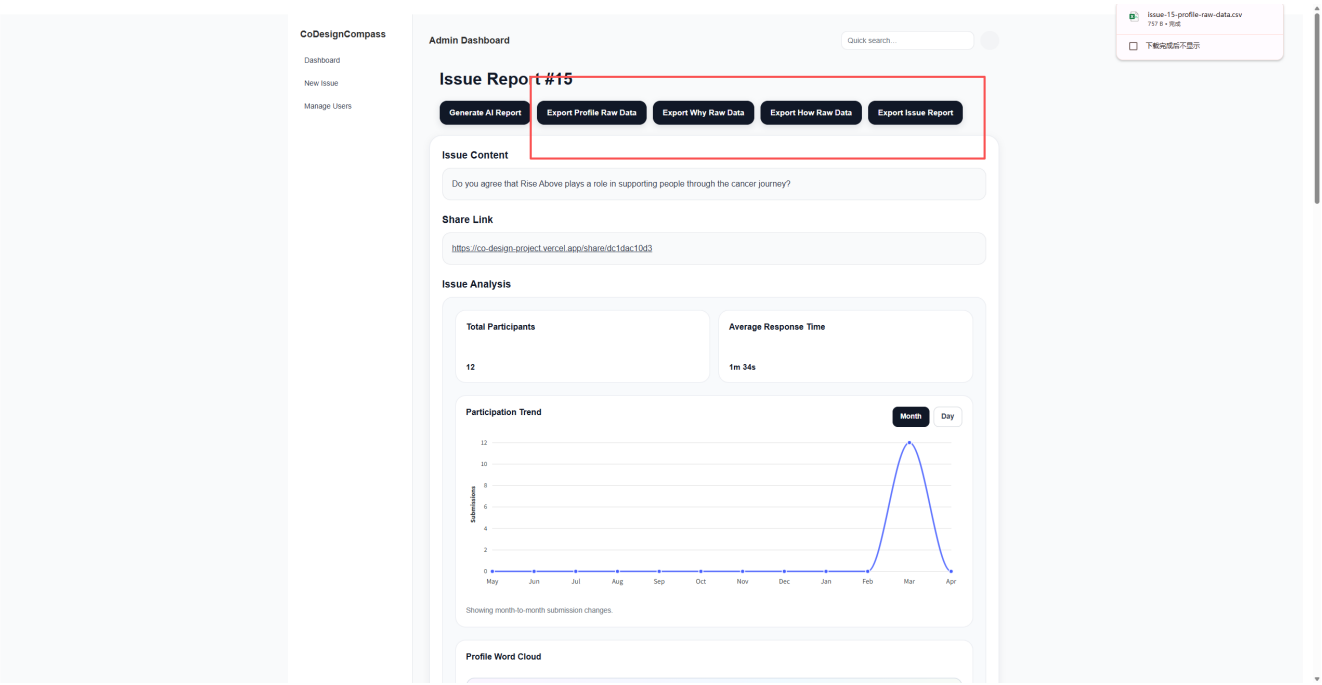
OPPORTUNITIES: Provide financial support to cover treatment, medication, travel, and living costs., Help patients afford essential items and preserve their dignity., Offer a 'hand up' to get through difficult times., Fund the needy for an illness which could dry up the funds of patients.

Holistic & Human-Centered Support

PAIN POINTS: Aspects of living with cancer often not considered., Quality of life is rarely an ingredient considered in a cancer patient's journey., Cancer and treatment are only one element of a person's being., The disease is the priority to the treating team but it impacts a human.

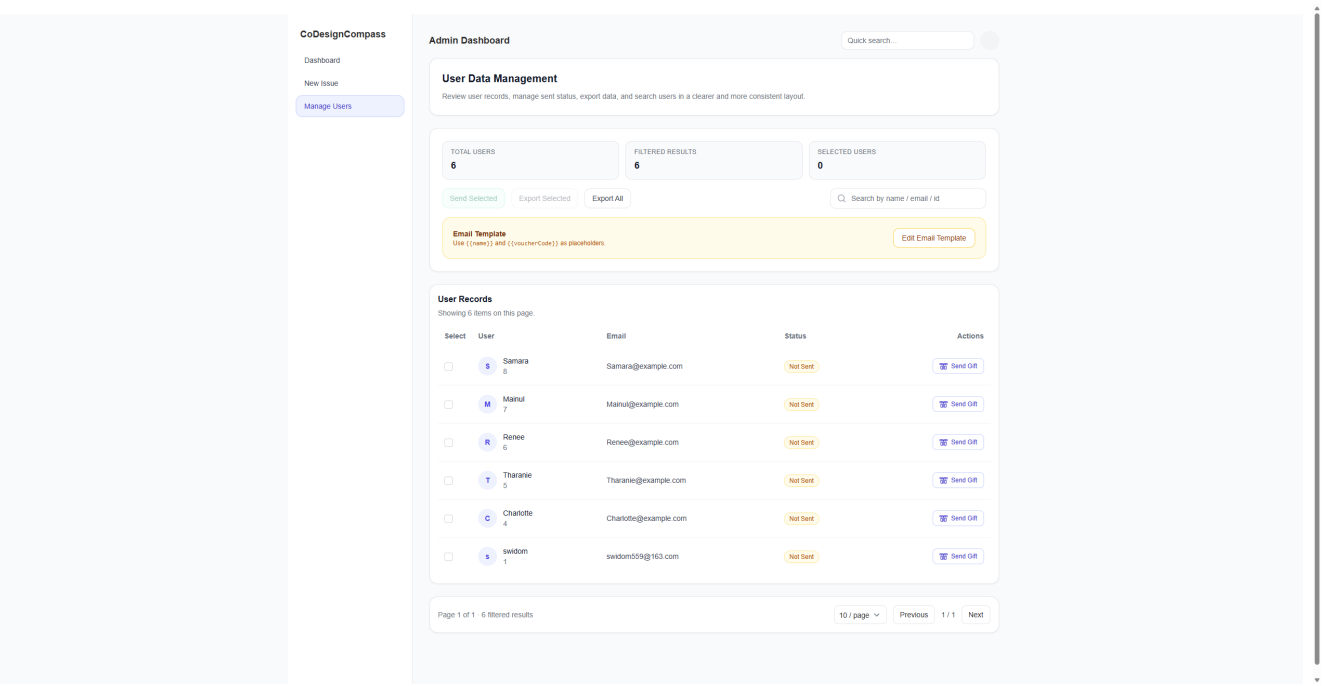
OPPORTUNITIES: Focus on the 'person' beyond the 'patient' and their medical interventions., Provide social outlets and community events to disrupt illness-focused lifestyles., Offer opportunities for patients to feel better in whatever way they need., Help patients maintain their identity, self, and community connections.

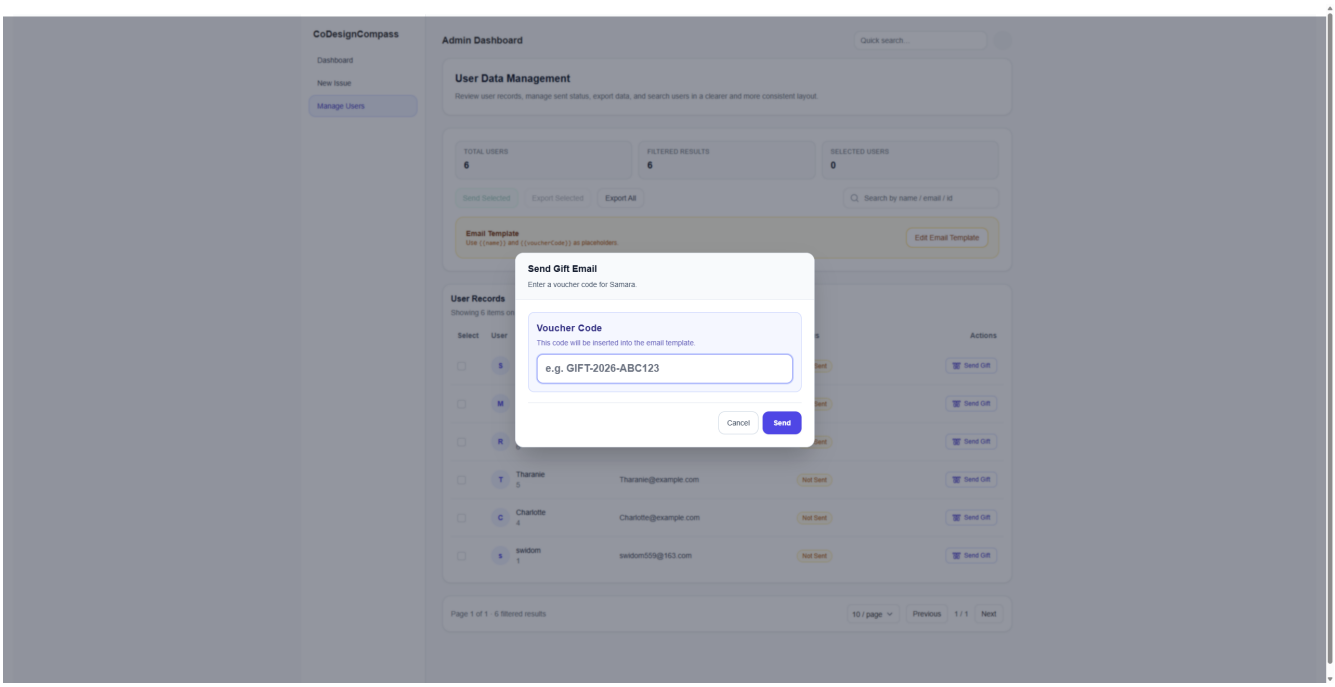
Also you can export raw data and final report if you want.



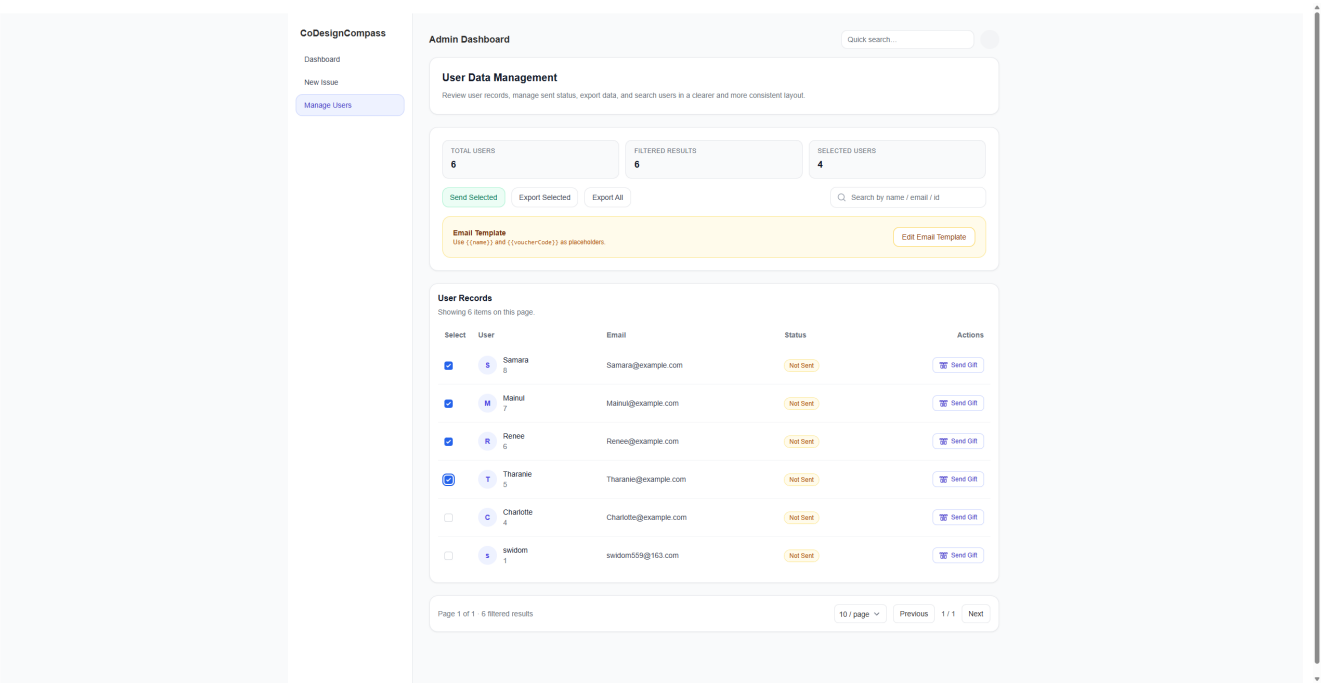
6. Managing Users

In this page you can send coupons to users who provided a valid email address.





You can choose either send them one by one or in a batch.



8. Conclusion

The platform enables administrators to efficiently manage issues, analyse user feedback, and gain insights through AI support, while ensuring that user responses remain unbiased and authentic.
